Subject: Microsoft Settlement

I don't even know why I'm wasting my time doing this. But I feel we can't ignore Microsoft's activities. they are getting stronger everyday. current settlement isn't acceptable. It does nothing to actually hold Microsoft accountable for having been found guilty of being a predatory monopoly. Their motto BEAT EM BUST EM THATS OUR CUSTOM. They are the Evil Empire. look at their relationship with Apple. It was all a muze. He's afraid of AOL Time Warner his NEW OS XP has made it impossible for their DSL/Cable service to operate on the system. They must be controlled. They have struck deals with Universities to supply software to students at 5.00 a disk. What a human gesture on the surface but you become addicted to using his product and when you leave school and have a FAMILY EVERYBODY is using his product because it's their why change etc etc. we need more options and he buys them out.. Like Corel. Can't touch Lotus it's IBM's. It sucks so does MS
